

Bean Bag Drop

- Place a bean bag or soft toy on your head and put your hands under my outstretched hands, at about waist level.
- Give me a signal such as “Ready” and when I say “Drop” tip the bean bag into my hands.
- Next put the bean bag on my head and wait until I say “Ready”. When you say “Drop” I will tip it into your outstretched hands.

This game helps me practise taking turns with you so that I can learn about taking turns with friends.

It helps me make eye contact with you and it helps me develop “impulse control” – the ability to think before acting.
