iii) the following is added as Schedule 6:

Emission-based Parking Charge

Where the parking charge specified in column 4 of Schedule 1 is a range between the lowest and highest charge for the period of parking specified in column 3 the parking charge for a vehicle within this range is calculated based on the vehicle's emissions as set out in the tables below.

A vehicle's CO2 data as recorded by the DVLA will be used to calculate the exact parking charge. Where this data is missing or null in the case of a non-electric powered vehicle the engine capacity data as recorded by the DVLA will be used to calculate the exact parking charge.

Where CO2 data and engine capacity data is not recorded by the DVLA or the DVLA have no record of the vehicle then the parking charge for the period of parking will be the highest emission-based parking charge as set out in column 3 of this schedule.
