

# Baby Quality

A toolkit to support tuning into babies

*'This essential toolkit... offers a skilful set of reflective audit tools, resources and activities that will enable settings to explore and improve upon the experiences for babies and their families.'*

Dr Janet Rose  
Principal, Norland College

*"The audits are very helpful in our practice... this allows us to see areas where we flourish."*

Setting Feedback

*"(The Toolkit) has supported us in identifying areas of environmental development within our under two's rooms."*

Setting Feedback

The Baby Quality toolkit has many exciting features to support you to evaluate and improve your provision for babies. These include:

- **Audits and an overview grid** so you can see, at a glance, the strengths and areas to develop in your setting.
- **Activities** that provide structure for staff meetings and individual reflection.
- **Resources** to support you to evaluate individual areas of your provision.
- **Top tips** to support your thinking and to give you snap shots of information to promote discussion.

The Baby Quality toolkit complements our popular and effective Toddler Quality toolkit and both are a must to help you provide the best possible provision for your 0-3 year olds.
