

Accessible Easygoing Walks

For Wheelchair Users, For People with Prams, For Everyone

6 EAST HARTREE WOOD.

Accessible Easygoing Walks

6 EAST HARTREE WOOD.

Start East Hartree Wood Car Park - OS Grid Ref:141-558541.

Distance Circuit approx. 2Km.

Parking Ample free parking.

Accessibility The path round the circuit has a good surface with just a couple of places where a pusher for a manual chair user may be useful. The whole circuit was found to take about 45 mins using a manual wheelchair.

Other information The main points of interest are the Smitham Chimney and a pond which are sites where Lead Smelting used to take place. These have been restored by the Mendip Society and there is an information point close to the pond.

The pond is a haven for wildlife and is one of the best sites in the country for dragonflies. There are views across the Chew Valley.

The walk was 'Road Tested' by CVAG members using a manual wheelchair in 2004.

The car park is large but the road surface is difficult in places for a wheelchair. There are picnic tables and seats in the car park and benches along the walk.
