TASKS UNDERTAKEN (associated with this post)	SIGNIFICANT HAZARD (associated with this task)	EXISTING CONTROL MEASURES IN PLACE.	ADDITIONAL CONTROL MEASURES REQUIRED	Risk Rating	Action Priority	Target Date: (for action by)	Completed on: (date and initial)
<p>Collection of bagged domestic waste.</p> <p>Black normal dust bin = 65cm, 80l = 86.5cm 120L = 90cm 140L = 106cm 240L = 107cm</p>	<p>Bags of waste being presented in a 'wheelie' bin for collection on a round that is not equipped with a bin lift.</p> <p>The operative would be required to lift 'outside of the base' by leaning into the bin to catch hold of sacks at the bottom of the bin which creates risk of muscular sprains and strains. There is also the possibility of the bin toppling over whilst the collector is leaning into it.</p>	<p>Customers are informed that the collection service is for sacks or normal dustbins only, which can be lifted and tipped in to the vehicle.</p> <p>Crews are instructed to leave waste that is presented in 'wheelie' bins and inform the office of the customers address.</p> <p>Customers are written to, in order to clarify policy and provide advice for future collections.</p>		Acceptable
