

Toddler Quality

A toolkit to support tuning into 2 year olds

'Practitioners who develop a good understanding and appreciation of the development of 2 year olds will not make the mistake of seeing them as ... less able under threes who disrupt "proper" activities.'

 @eybathnes

“The toolkit has helped us think about the two year olds as a different cohort with different needs and that therefore we should have different expectations of them.”

Setting Feedback

“We found the audits in the toolkit impacted our practice significantly. They allowed us to change our ways of thinking about certain aspects of practice, routines and structure.”

Setting Feedback

The Toddler Quality toolkit has many exciting features to support you to evaluate and improve your provision for 2 year olds. These include:

- **Confidence audits** so you can see, at a glance, your strengths, show the distance travelled and evidence the impact of changes you have made.
- **Activities** that provide structure for staff meetings, support professional dialogue and help you to gather information and evidence.
- **Resources** to assist you to evaluate individual areas of your provision.
- **Top tips** to give you snap shots of information and to promote discussion.

The Toddler Quality toolkit complements our popular and effective Baby Quality toolkit, and both are a must to help you provide the best possible provision for your 0-3 year old children.
